be Creative

WILDLY UNIQUE

UNIQUE INNOVATIVE ACCESSIBLE

The BE CREATIVE brand consists of special products, developed and hand-picked with creativity and special customisation in mind.

We use various natural and geometrical patterns as well as animals in vivid colours to illustrate the wide range of customisation possibilities, highlighting an essential feature of the BE CREATIVE brand.

UNIQUE

The BE CREATIVE Collection offers a high degree of customisation. These special products ensure that your message or image is always presented in style.

INNOVATIVE

BE CREATIVE products are manufactured and imprinted utilising the latest technologies. Imprints are almost entirely made with digital technologies, ensuring colourful and high-resolution prints.

ACCESSIBLE

The BE CREATIVE Collection is manufactured, assembled or printed in Europe. This ensures short delivery time and low minimum order quantity, even for entirely custom-made products. Utilising modern manufacturing and printing technologies warrants the competitive price level of the BE CREATIVE Collection. This showcase only represents a small selection of the BE CREATIVE products; you can find many more throughout the following chapters of the catalogue.

BE CREATIVE CUSTOM PRODUCTS

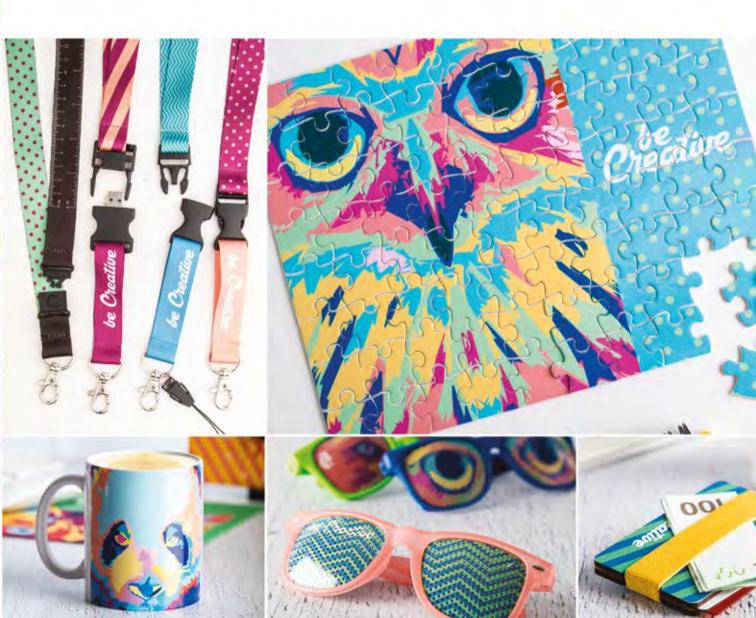

BE CREATIVE Custom Products give you the opportunity to mix and match the colour or material or design the shape of product parts to make them truly unique. These products are custom made in our in-house production facilities or assembled from our stock of parts, ensuring short lead-times.

BE CREATIVE COLOUR PRINT

BE CREATIVE Colour Print Products allow full-colour printing large areas, or even the complete surface of the product. Large and vivid-coloured imprints are mostly achieved by modern digital printing technologies, such as epoxy doming, UV LED, sublimation and vision film printing.

BE CREATIVE RAINBOW ENGRAVING

BE CREATIVE Rainbow Engraving Products are selected metal items compatible with the latest advancement in laser engraving technology. Rainbow engraving allows imprinting six basic colours with special laser beams, without using inks or chemicals.

BE CREATIVE SPECIAL ENGRAVING

BE CREATIVE Special Engraving Products are specially designed for a unique laser engraved appearance. Thanks to the special dual-layer coating on the product's surface, laser engraved logos appear in colour or with mirror-effect.

BE CREATIVE LIGHT UP YOUR LOGO

BE CREATIVE Light Up Your Logo Products contain LED lights, hidden inside their housing, resulting in a special backlit-effect of your engraved logo.

PRINTING TECHNOLOGIES

Choosing the best gift - from our wide product collection - for your promotional needs is only half of the success equation. The appearance of your logo or message carries equal importance. In order to ensure the realisation of your brand image, we provide various printing technologies, ranging from traditional methods to state of the art digital technologies.

The following guide aims to give you a brief overview of our labelling techniques and to help you pick the best for your selected item.

PAD PRINTING

Pad printing is the most popular, traditional ink-based labelling method. This technology uses a silicone pad to transfer ink onto an item with fine details and high accuracy, applicable to a wide range of materials. Pad printing allows labelling curved surfaces.

SCREEN PRINTING

Screen printing is a traditional ink-based labelling process, for flat or flattenable products, with high durability and colour accuracy. During the screen printing process ink is directly pressed on the product's surface through a gauze, then fixed with heat treatment.

Transfer printing is based on traditional screen printing, however, instead of being directly screen printed onto an item, the design is printed onto transfer paper, then applied with a heat press. Transfer printing is applicable to a wide range of products and holds several advantages over screen printing.

UV LED PRINTING

UV LED printing is a full-colour, digital labelling process utilising UV-cured inks. Logos are directly printed on the product's surface in high-resolution, resulting in instant photo quality imprints.

SUBLIMATION PRINTING

Sublimation printing is a full-colour, digital labelling technique with photo quality. Designs are printed with special ink on a transfer paper, then heat-pressed onto the product's surface, Sublimation is only applicable to light coloured polyester and sublimation coated products.

EPOXY DOMING

Epoxy doming is a unique printing technology, using full-colour printed stickers covered with 2 component resin. As a result, the treated sticker will have a 3-dimensional look. Epoxy domed logos can be produced in custom shapes and are resistant to UV rays.

VISION FILM PRINTING

Vision Film printing is a special printing technique for labelling sunglasses lenses. During the labelling process, a digitally printed and perforated film is applied enabling a high degree of customisation.

DIGITAL PRINTING

Digital printing is used to imprint paper products and paper inserts in photo quality. Paper inserts can be produced in various sizes and shapes.

VINYL STICKER

Vinyl stickers are digitally printed full-colour, self-adhesive stickers applicable to various, otherwise hard to print, products. Vinyl sticker logos can be produced in various sizes and shapes.

CERAMIC PRINTING

Ceramic printing is used to label mugs, glasses and certain metal items using special ceramic paints fired at high temperature. The label is applied to the product similarly to transfer printing, then fired in a furnace.

CERAMIC PAD PRINTING

Ceramic pad printing is an inexpensive labelling process for ceramic and glass products using special inks. It is suitable for logos up to 2 colours in moderate size.

EMBROIDERY

Embroidery is used to label textile products, resulting in durable and high-quality imprints, by an automatic embroidery machine which applies thread through needle stitches. Pantone matching is not achievable, due to limited thread colours.

ENGRAVING

Engraving utilises lasers to mark a product's surface. The surface of the product practically burns in the process to develop the logo. Even small logos can be printed very accurately. Engraving is applicable to metal, wooden, glass and certain plastic products.

RAINBOW ENGRAVING

Rainbow engraving is a special laser engraving technology, utilising different wavelength laser beams to achieve coloured imprints on metal items, without the use of inks or chemicals.

EMBOSSING

Embossing is an elegant process that changes the surface of the material that has been embossed, through forming a 3D impression. This impression is achieved by pressing a specially-made die onto the product's surface.

CYLINDRICAL SCREEN PRINTING

Cylindrical screen printing is a special kind of screen printing for labelling bottles. The cylindrical screen printing machine rotates the product parallel with the gauze, resulting in continuous prints throughout the surface of the product.

WHITE PRINTING

White printing is a special full-colour printing technology for white products, which is based on transfer printing.

CERAMIC WHITE PRINITING

Ceramic white printing is a special full colour printing technology for white ceramic products, which is based on ceramic printing.

TECHNOLOGY & MOBILE

Keep up with modern technology and be prepared for every situation. Whether you listen to music, take photos or manage your business, we have all the essential accessories for your mobile and laptop – from smart watches through bluetooth speakers and selfie sticks to powerbanks. Wherever you go use the gadgets that suit your goals and style best!
